

HSC SEX, AGE, SHELL CONDITION DATA SHEET

Age of HSC: 1 – Newly molted adult. Shiny, pale, or tan colored shell, with few or no slipper shells or other marine epiphytes.

- 2 Middle aged adult. Some wear on brown shell, sporadic barnacles, slipper shells or other marine epiphytes.
- 3. Old age adult. Dark chocolate brown shell. Lots of wear, so shine. Lots of encrusting organisms. Telson may be shorter.
